

New collection  
**Orthoboom**

2022

For more than 25 years, Orthoboom – a German inclusive brand – has been producing children's footwear in the Healthy Footwear segment. We make footwear that teaches a child to put the foot in the right position and prevents spine curvature disorders.

Up to date, we have participated in more than 50 international research projects on the effect of footwear design on the development of the musculoskeletal system in children. Today, our footwear is purchased in 10 countries around the world. All our products are certified to include the European CE marking.

We make fashionable footwear for children's health. Among our partners is a Milan-based design office. We update our collections twice a year.

**We are proud of our footwear!**

### Our goal:

To help every child to develop healthily and enhance the quality of life for every adult.

### Our mission:

To provide children with the freedom to express themselves. To give them comfort and stability combined with the ability to walk confidently toward their goals.

### Our values:

Health. Sustainability and eco-friendliness. Caring for those around you. Development. Innovation. Social responsibility. Compassion. Inclusion.

Orthoboom's 2022 collection features a wide range of the most fashionable models: sandals, dress shoes, boots, winter boots, sneakers, and canvas shoes.

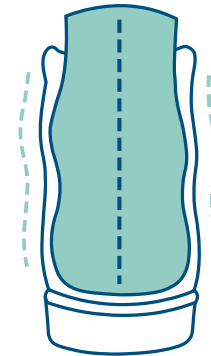

For the most active and the most curious. New discoveries and new adventures with Orthoboom footwear.

## A-Lock anatomical shoetree

The anatomical shoetree with an anatomical profile (R) that fully follows the shape of the child's ankle. A-Lock's design is based on the results of studies of the anatomy and biomechanics of the foot in 3,500 children from 1 to 16 years old.

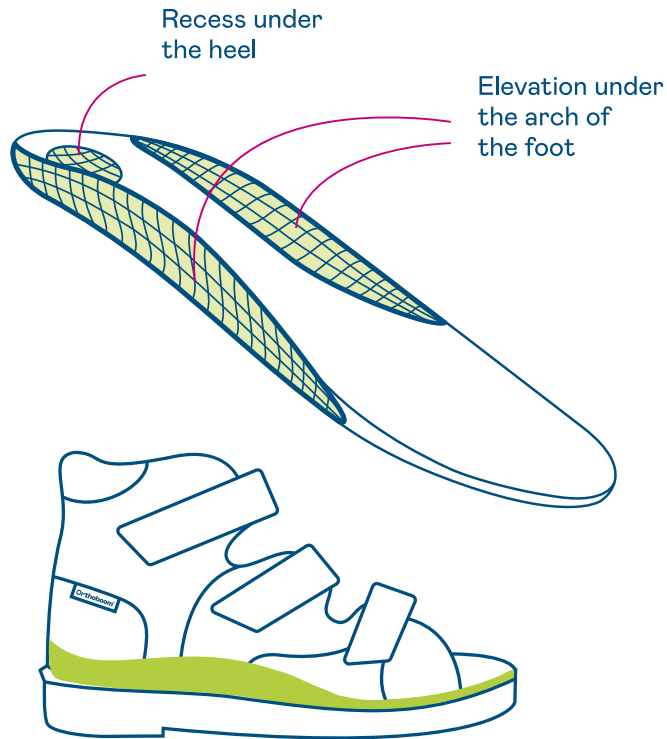

## A-Lock

## PreVent

## Tight PreVent heel counter

The comfortable molded PreVent heel counter fixes the foot in the right position, thus preventing the heel from tilting to the side. This helps the child to develop a correct gait.

**StepEx**

### Removable StepEx insole

The branded removable StepEx insole with the arch support and a recess under the heel evenly distributes the load on the foot. It absorbs shock loads.

## Soft KindTouch heel collar

KindTouch is a soft material on the inner edge of the heel counter that prevents chafing and discomfort when walking.

## KindTouch

## Weightless BaseCloud sole

The weightless BaseCloud air cushion sole in the Orthoboom Air line cushions the foot and works to prevent flat feet.

### Natural materials

They allow the foot to "breathe" while regulating heat exchange without irritation. A leather, nubuck, or textile upper. A leather or well-ventilated fabric lining. Natural fur. Cotton fabrics.

### Large LowOpen opening

It allows the child to put on footwear on their own. Easily adjustable fasteners (velcro, buckles, laces) provide a reliable fixation of the child's foot whatever the foot width is.

## Thomas Heel

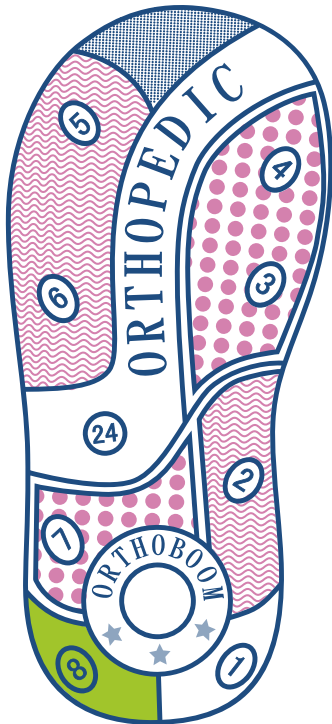

The wide Thomas heel, extended on the inside, distributes the load on the foot properly with increased stability.

## 8Z-TEST

### 8Z-TEST diagnostic system

The 8Z-TEST home diagnostic system on the sole. You can monitor the development of the child's foot by the abrasion zones.

### Segments where the sole abrasion is detected:

Thanks to the ribbed surface and separation into abrasion control zones, Orthoboom footwear can help identify the uneven load distribution on the foot.

- 1 The risk of developing flat feet.
- 2 Pronounced pathology: flat feet, valgus flat foot deformity, valgus knee deformity, valgus ankle, and foot overpronation when standing (excessive rolling of the feet inward and downward when standing with fallen arches). A consultation with an orthopedist is required.
- 3 Pronounced pathology: equinus foot deformity, clubfoot, varus deformity of the knees, lower legs, etc. A consultation with an orthopedist is required.
- 4 Possible manifestation of infantile cerebral palsy in a mild form. A consultation with a neurologist is required.
- 5 The risk of developing flat feet.
- 6 Pronounced pathology: flat feet, valgus flat foot deformity, valgus knee deformity, valgus ankle, and foot overpronation when standing (excessive rolling of the feet inward and downward when standing with fallen arches). A consultation with an orthopedist is required.
- 7 Pronounced pathology: equinus foot deformity, clubfoot, varus deformity of the knees, lower legs, etc. A consultation with an orthopedist is required.
- 8 Healthy, regular feet with no abnormalities detected. Orthopedic footwear serves to prevent disorders.
